### EXPERIENCE

#### No Fuss Tutors - Vancouver, BC

##### CTO | October 2020 - Present

- Solely responsible for DevOps within No Fuss Tutors, from version control to testing, deployment, maintenance of production applications, and organization of our team's agile workflow.
- Led development, from design to deployment, of four major applications.
- Led integration of libraries and APIs such as Twilio, Stripe, Google, TutorCruncher, and WebSockets.
- Responsible for the onboarding process of junior developers and interns during my time, aiding their growth both by code-review and assistance with TypeScript, React, Express, and Mongo.

##### Full Stack Web Developer | June 2020 - October 2020

- Planned, organized, and created the first full-stack application within No Fuss Tutors, aimed at increasing the efficiency of our administrators by allowing them to quickly pair tutors with clients based on location and subject eligibility.
- Integrated multiple APIs that enabled our sales team to double weekly growth by opening multiple avenues for client-acquisition.

#### BrainStation - Vancouver, BC

##### Teaching Assistant | January 2020 - March 2020

- Provide students with hands-on teaching that includes pair-programming, whiteboard sessions, and code-alongs.
- Responsible to mark over 10 assignments each week, providing feedback for students on JS best practices, potential bugs in their code, and areas for improvement.

### EDUCATION

#### BrainStation | Diploma, Web Development

SEP 2019 - DEC 2019, Vancouver, BC

#### Queen's University | Bachelors (Honours) in History, Minor in English

September 2014 - April 2019, Kingston, ON

### SKILLS

JavaScript, TypeScript, Node.js, React.js, Express.js, MongoDB, Jest, Cypress, Heroku, AWS, Github, HTML, CSS

### PROFILE

I am a growth-oriented logical thinker that loves to solve problems. With those attributes I've come into Web Development because I loved the continuous growth that the industry requires and the logical thinking that is necessary to produce high-quality software. Despite my recent entry into this industry I've been able to lead teams in the development of full-stack applications from design to deployment and maintenance. With my current experience I have confidence in my own problem-solving and development skills but am looking for an opportunity where I will be able to grow under the mentorship and guidance of more experienced developers.
